

Adjusting Solutions Creates Further Working Associations

“**Adjusting Solutions**, a niche London Market Chartered Loss Adjusting practice established to handle complex and major loss, is pleased to announce an expansion of its activities and the formation of working associations with Signum Consulting and Core Insurance Services Ltd to provide wider territorial spread and enhanced technical and service capability.

Signum Consulting UK, based in Scotland, is a Chartered Loss Adjusting practice independently owned and managed by Directors Martin Shearer and David Scott. They undertake assignments for both Property and Liability claims across a wide range of disciplines and industries for Insurance Companies; Lloyds Underwriters; Insurance Brokers and Commercial clients. In particular they are well versed in Scottish Law and business practise and the handling of complex and major loss incidents.

Core Insurance Services Ltd, based in the South East of England, is a Chartered Loss Adjusting practice established by David Miles and Alan Hines specialising in liability and contractors all risks claims and in particular providing an accident/injury/disease related specialism. Their practice has both claims management (cradle to grave) and loss adjusting capabilities. Also, as individuals, David is known for his expertise in the Sports and Leisure sector whilst Alan is ex Builders Accident and focuses on construction industry claims.”

Tom Battell, Director Adjusting Solutions advised:

“This is a natural progression for us. Our clients have been pleased with the skills and attention that we have brought to their “shopfront” – where the claims performance demonstrates the policy promise. They would like more of the same across a wider claims front and increased territory whilst retaining named individuals for their personal skills and abilities. Our associations enable us to put this in place with competent self motivated individuals well known to us. We are still in a people business where complex claims are concerned.”

Martin Shearer, Director Signum Consulting UK, commented: “Our strategic partnership with Adjusting Solutions and Core Insurance Services is an exciting development. We will be working in association with like-minded specialist adjusters who have a wealth of knowledge and expertise in the industry. This will enhance our ethos of providing a personalised and

dedicated loss adjusting service to our valued Principals at a local level in the UK and abroad”.

David Miles, Director Core Insurance Services added:
"We are delighted to be able to work with respected associates Adjusting Solutions. Together I know we can deliver a quality product in specialist areas. We have in place the core personnel to provide the relevant skills and expertise to deal with losses in a wide variety of disciplines.

We very much look forward to developing a broad range of adjusting and investigating services with Tom and his partners and associates."
